**Company Overview:**

Xclusive Marketing offers many services include websites, web design, hosting, graphic design, marketing brochures, business cards, post cards, sales packets, magazines, logo design, flyers, advertising, printing and more.

Xclusive also owns FatBoyHosting.com and the Hurricane Valley Journal, a community oriented feature newspaper.

Our custom websites are designed to be user friendly as well as appealing to consumers. Whether small or large, our website hosting services are catered to meet individual needs, with hosting packages starting as low as \$5.99 per month. Unlimited support is offered at no additional fee.

Each package comes with a web hosting control panel, making it easy to add new POP email accounts, read web-based email, change passwords, create a database, add shopping carts and view stats.

Our professional graphic artists design flyers, post cards, business cards, logos and other forms of advertising with marketability and consumer appeal their top priority.

We also offer printing, addressing and mass mailings of postcards, parcels and business notifications.

The Hurricane Valley Journal is published twice each month with the residents of Hurricane Valley in mind. Local businesses and outstanding residents are the main features in this community-based paper. Residents are kept in touch with current events, and businesses are given an unbeatable form of advertising to their target market.

We believe in representing the truth in a positive and uplifting manner and helping those who require our services. We also believe the most important assets to our company are our customers.
